## Tomizone strategic partnership with Avaya

- Tomizone enters strategic partnership with Avaya
- Expansion of product offering into the SME market
- Opportunity to expand the business in Australia

**SYDNEY, 23 July 2018** - The Board of Tomizone Limited (ASX: TOM) are pleased to announce a strategic partnership with [Avaya](#) (NYSE: AVYA), a global unified communication technologies provider in the New Zealand market.

Avaya partner certification gives Tomizone the ability to service enterprise customers with upwards of 1,000 users/extensions, and is another significant entry point into the enterprise market. The [Avaya Unified Communications](#) suite is complimentary to Tomizone's existing SME IP PBX offering ([TomiTalk](#)), and will provide an additional, more sophisticated solution in the 10+ extension space. Tomizone will focus its attention on Avaya's flagship IP Office solution (currently 26 million users globally), which allows flexible on-premise, cloud, or hybrid installations.

As part of Tomizone's recently announced acquisition of the business and assets of Sweep Internet Limited, Sweep's maintenance and support contracts of a number of enterprise Avaya users in New Zealand will also be transferred to an Avaya-centric division of Tomizone's Customer Care team.

The strategic partnership compliments the expanding Tomizone product suite and is consistent with the company's strategy of growth through acquisition of products, services and clients. Under this agreement Tomizone will expand the product offering and increase Tomizone's client database in New Zealand. Tomizone will also seek Avaya Partner Certification in Australia, which will give the Company the ability to extend its supply and support offering to the growing Australian Tomizone client base and the wider Australian market.

### About Tomizone

Tomizone offers an extensive suite of managed services, encompassing WiFi & Analytics, Business Cloud Applications, VoIP, Data Redundancy, Business Security and Point of Sale. A monthly subscription model for all services gives SME through to multi-site enterprise clients a predictable, consolidated fee for all hardware, software, email, backup, telephony and security requirements, along with best-in-class priority support. As a managed services provider, the Company's strategy is simple: increase a client's bottom line, reduce their ICT burden, and harness their competitive edge by facilitating a stronger connection with their customers.
